

# Protective Film - Safety Data Sheet

According to (EC) No. 1907/2006 (REACH), Annex II

## Section 1: Identification

**Product Name:** Protective Film  
**Product Code:** CP, WP, HP

**Recommended use:** Use for special-shaped materials such as steel, aluminum alloy, plastic plate, building materials, glass plate, household appliances.

**Restrictions on use:** --

Supplier:	T.I Midwood & Co. Ltd TIMCO House Green Lane Wardle Nantwich CW5 6BJ	T.I Midwood & Co. Ltd Aviemore House Hill Street Monahan Ireland
-----------	-------------------------------------------------------------------------------------	------------------------------------------------------------------------------

Emergency Help Line: 01865 407333 (24 hour service)

## Section 2: Hazard identification

**Classification of the substance:** Not applicable

**GHS label elements:**

**pictogram(s):** --

**Signal word:** --

**Hazard statement(s):** --

**Precautionary statement(s):**

•**Prevention:** --

•**Response:** --

•**Storage:** --

# Protective Film - Safety Data Sheet

According to (EC) No. 1907/2006 (REACH), Annex II

•**Disposal:** --

**Other Hazards:**

Combustible. Decomposes on heating. This produces toxic and irritating fumes. This generates fire and explosion hazard. Finely dispersed particles form explosive mixtures in air. Reacts violently with fluorine. Reacts with strong acids and strong oxidants.

Inhalation of dust may cause Cough.

See Section 12 for environmental hazards.

## Section 3: Composition/information on ingredients

Article.

Chemical Name	CAS No.	Percent (by weight)	EC /List No.	Classification according to regulation (EC) No 1272/2008 [CLP]
Polyethylene	9002-88-4	90	618-339-3	Not Classified
2-Propenoic acid, polymer with butyl 2-propenoate and isooctyl 2-propenoate	63793-44-2	10	--	--

## Section 4: First-aid measures

<b>Inhalation</b>	IF INHALED: remove person to fresh air and keep comfortable for breathing. Get medical help if you feel unwell.
<b>Skin Contact</b>	IF ON SKIN: Wash with plenty of water and soap. If skin irritation occurs: Get medical help. IF MOLTEN MATERIAL GETS ON SKIN, cool rapidly with cold water. Do not attempt to remove material from skin. Obtain medical treatment for thermal burn.

# Protective Film - Safety Data Sheet

According to (EC) No. 1907/2006 (REACH), Annex II

	Cover skin burns with dry sterile dressings after decontamination.
<b>Eye Contact</b>	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical help.
<b>Ingestion</b>	IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. Get medical help.

**Personal protective equipment for first-aid responders:** Use proper personal protective equipment as indicated in Section 8.

**Most important symptoms/effects, acute and delayed:** See Section 11 for more information.

**Indication of immediate medical attention and special treatment needed:** Treat symptomatically and supportively. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves.

## Section 5: Fire-fighting measures

**Suitable extinguishing media:** Use water spray, powder, foam, carbon dioxide.

**Unsuitable extinguishing media:**

Water may be ineffective.

Do NOT direct a solid stream of water or foam into burning molten material; this may cause spattering and spread the fire.

**Specific Hazards arising from the chemical:**

Organic powders when finely divided over a range of concentrations regardless of particulate size or shape and suspended in air or some other oxidizing medium may form explosive dust-air mixtures and result in a fire or dust explosion (including secondary explosions).

May emit poisonous fumes.

May emit corrosive fumes.

Combustion products include:

- carbon monoxide (CO)
- carbon dioxide (CO<sub>2</sub>)
- other pyrolysis products typical of burning organic material.

**Specific protective actions for fire-fighters:**

# Protective Film - Safety Data Sheet

---

According to (EC) No. 1907/2006 (REACH), Annex II

Alert Fire Brigade and tell them location and nature of hazard.  
Wear breathing apparatus plus protective gloves.  
Prevent, by any means available, spillage from entering drains or water courses.  
Use water delivered as a fine spray to control fire and cool adjacent area.  
DO NOT approach containers suspected to be hot.  
Cool fire exposed containers with water spray from a protected location.  
If safe to do so, remove containers from path of fire.  
Equipment should be thoroughly decontaminated after use.  
Special protective actions for fire-fighters:  
In the event of fire, wear self-contained breathing apparatus and protective suit.  
Structural firefighters' protective clothing will only provide limited protection.

## Section 6: Accidental release measures

### **Personal precautions, protective equipment and emergency procedures**

See section 8.

### **Environmental precautions:**

See section 12.

### **Methods and materials for containment and cleaning up:**

#### SMALL SPILLS

Clean up all spills immediately.

Contain and absorb spill with dry sand, earth, inert material or vermiculite.

Scoop up solid residues and seal in labeled drums for disposal.

#### LARGE SPILLS:

Clear area of personnel and move upwind.

Contain spill with sand, earth or other clean, inert materials.

Collect any recoverable product into labeled containers for possible recycling.

Collect residues and seal in labeled drums for disposal.

Wash area and prevent runoff into drains.

IF contamination of drains or waterways occurs advise emergency services.

## Section 7: Handling and storage

# Protective Film - Safety Data Sheet

According to (EC) No. 1907/2006 (REACH), Annex II

## Precautions for safe handling:

NO open flames.

Avoid inhalation of dust.

Wear protective clothing when risk of exposure occurs.

Dust explosion-proof electrical equipment and lighting.

Prevent deposition of dust.

Use in a well-ventilated area.

Prevent concentration in hollows and sumps.

DO NOT enter confined spaces until atmosphere has been checked.

Avoid contact with incompatible materials.

When handling, DO NOT eat, drink or smoke.

Avoid physical damage to containers.

Always wash hands with soap and water after handling.

Work clothes should be laundered separately. Launder contaminated clothing before re-use.

Use good occupational work practice.

Atmosphere should be regularly checked against established exposure standards to ensure safe working conditions are maintained.

## Conditions for safe storage:

Keep away from heat, hot surfaces, sparks, open flames and other ignition sources.

No smoking.

Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from acids and strong oxidants and food and drink.

## Section 8: Exposure controls/personal protection

### Control parameters

CAS No.	DNELs Exposure Pattern Worker	PNECs Compartment
9002-88-4	No data available	No data available
63793-44-2	No data available	No data available

### • Occupational exposure limits:

# Protective Film - Safety Data Sheet

According to (EC) No. 1907/2006 (REACH), Annex II

CAS No.	Long-term exposure limit (8-hr TWA) mg/m <sup>3</sup>	Short-term exposure limit (15-minute) mg/m <sup>3</sup>	Comments
9002-88-4	No data available	No data available	--
63793-44-2	No data available	No data available	--

## Emergency limits

CAS No.	Revised IDLH
9002-88-4	No data available
63793-44-2	No data available

## Appropriate engineering controls:

Enclosure and/or isolation of emission source which keeps a selected hazard "physically" away from the worker and ventilation that strategically "adds" and "removes" air in the work environment.

Dust explosion-proof electrical equipment and lighting.

Local exhaust ventilation usually required.

If risk of overexposure exists, wear approved respirator.

Provide adequate ventilation in warehouse or closed storage area.

## Personal protective equipment:

### Eyes Protection:

- Safety glasses with side shields.
- Chemical goggles.
- Contact lenses may pose a special hazard; soft contact lenses may absorb and concentrate irritants.
- Eye wash unit.

### Skin and Body Protection:

- When handling hot or molten liquids, wear trousers or overalls outside of boots, to avoid spills entering boots.
- Overalls.
- P.V.C. apron.
- Barrier cream.
- Skin cleansing cream.
- Safety footwear or safety gumboots, e.g. Rubber.

# Protective Film - Safety Data Sheet

According to (EC) No. 1907/2006 (REACH), Annex II

## **Respiratory Protection:**

Wear suitable respiratory protective equipment if exposure to dust or fumes is likely. Particulate filter respirator adapted to the airborne concentration of the substance.

## **Hand Protection:**

- General protective gloves, eg. light weight rubber gloves.
- Chemical protective gloves, e.g. PVC.

**Thermal hazards:** No data available.

## Section 9: Physical and chemical properties

**Physical State:** clear transparent solid film

**Odour:** odorless

**Odour threshold:** No data available

**pH:** No data available

**Melting point/freezing point:** No data available

**Boiling point or initial boiling point and boiling range:** No data available

**Flash Point:** No data available

**Explosive limits:** No data available

**Vapour pressure:** No data available

**Density / Relative density:** No data available

**Relative vapor density:** No data available

**Solubility in Water:** Immiscible

**Partition coefficient: n-octanol/water:** No data available

**Auto-ignition temperature:** No data available

**Decomposition temperature:** No data available

**Kinematic viscosity:** No data available

**Explosive properties:** No data available

**Oxidising properties:** No data available

**Particle characteristics:** No data available

**Flammability (solid, gas):** Combustible Solid.(ICSC)

## Section 10: Stability and reactivity

# Protective Film - Safety Data Sheet

According to (EC) No. 1907/2006 (REACH), Annex II

## Reactivity:

CAS#9002-88-4

Reacts violently with fluorine.

(HSDB)

Is attacked by oxidizing agents such as nitric and perchloric acids, free halogens, benzene, petroleum ether, gasoline and lubricating oils, aromatic and chlorinated hydrocarbons.

(NTP, 1992)

**Chemical Stability:** Unstable in the presence of incompatible materials.

**Conditions to Avoid:** See section 7.

**Incompatibilities with Other Materials:** Strong acids and strong oxidants.

**Hazardous Decomposition Products:** See section 5.

## Section 11 - Toxicological information

### Acute toxicity:

CAS No.	LD <sub>50</sub> /LC <sub>50</sub>
9002-88-4	LD <sub>50</sub> >2000mg/kg rat oral
63793-44-2	No data available

**Skin irritation/corrosion:** No data available.

**Serious eye damage/irritation:** No data available.

**Respiratory or Skin sensitisation:** No data available.

**Germ cell mutagenicity:** No data available.

**Carcinogenicity:** No data available.

**Reproductive toxicity:** No data available.

**Specific target organ toxicity-Single exposure:** No data available.

**Specific target organ toxicity-Repeated exposure:** No data available.

**Aspiration hazard:** No data available.

## Section 12 - Ecological information

# Protective Film - Safety Data Sheet

According to (EC) No. 1907/2006 (REACH), Annex II

## Toxicity:

CAS No.	Ecological Toxicity
9002-88-4	No data available
63793-44-2	No data available

## Persistence and degradability:

CAS#9002-88-4

Polyethylene films incubated in aerobic and anaerobic bioreactors did not degrade over the course of 4-week to 25-week exposure periods.

Similar experiments conducted using aerobic and anaerobic bioreactors concluded no biodegradation of polyethylene occurred over 40-70 day incubation periods. (HSDB)

**Bioaccumulative Potential:** No data available.

**Mobility in Soil:** No data available.

**Other adverse effects:** No data available.

## Section 13 - Disposal considerations

### Disposal method:

Disposal should be in accordance with applicable regional, national and local laws and regulations.

The generation of waste should be avoided or minimized wherever possible.

### Contaminated Packaging:

Contaminated packaging material should be treated equivalent to residual chemical. Clean packaging material should be subjected to waste management schemes (recovery recycling, reuse) according to local legislation. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

## Section 14 - Transport information

### Air transport (IATA /DGR6<sup>nd</sup>)

UN Number: --
